<b>Violation Description</b> *	<p>As reported to the EPA Superfund site community contact (Margot PerezSullivan), I've had concerns since March 2021 about Apple's oversight &amp; lack of due diligence for the safety of their employees in the TRW Microwave Superfund site (825 Stewart). I've expressed concerns about negligence and even recklessness, possible violations of Right to Know &amp; OSHA. Worse, Apple's response has been to misrepresent their activities and the site, intimidate me to not speak about workplace safety concerns related to the site, and have refused to notify the Federal EPA of changed circumstances at the site (e.g. cracks in the cement floor requiring repair). Apple has frequently told me they refuse to answer any of my questions about safety or the site, and even pressured me into requesting an ADA accommodation request to work remotely to not be exposed to the chemicals at the site, after pressuring me to file a worker's comp claim for a fainting spell I had in 2019, which I believe to be caused by vapor intrusion. Apple has refused to test the indoor air for vapor intrusion until after they seal the cracks, despite the last testing being done in 2015 and was limited (10hrs) and the only time the results ever came back without vapor intrusion above max EPA industrial limits (there was a long history of toxic indoor air vapor intrusion in the building). Further, Northrup Grumman is the responsible party and their ex-CEO/President, Ronald Sugar, is now on the Board of Directors of Apple &amp; the Chair of the Finance &amp; Audit committee. I can provide documentation for all of the above. I reported my concerns about conflicts of interest to Apple. I've also filed DOL OSHA Whistleblower retaliation complaints, and claims with the EEOC, NLRB, &amp; CA DEFH.</p>
