Subject: Fwd: EHS Follow up Date: May 19, 2021 at 2:18 PM

To: David Powers powers@apple.com

FYI, as discussed, EHS won't answer any of my pending or future questions about vapor intrusion in Stewart 1.

They also now don't know if they will even test the indoor air — and there is no timeline for making that decision.

My summary of meeting notes below.

Ashley M. Gjøvik **€** Engineering Program Manager (408) 204-9976

To: Jenna Waibel <jwaibel@apple.com>, Michael Steiger <msteiger@apple.com>

Thanks for meeting today! Feel better Michael.

Here's my notes from our discussion. Let me know if I missed anything.

I have access to all publicly available information about the site per the gov websites. The report Michael previously shared should include all details for both May & Dec 2015 testing. Unless VI testing is done in the future, no additional data will be shared. If VI testing is done in SD01 in the future, the results will be shared with me. There is no timeframe for testing for vapor intrusion in Stewart 1. EHS might not test for vapor intrusion in Stewart 1 this year, or near future — they are looking over the building evaluation report and then will make a decision at an unspecified time whether they do VI testing or not.

Michael said that as an expert, he and EHS have reviewed the data for SD01 and feel there is no Vapor Intrusion occurring there and they've done what's necessary to ensure the safety of the building for the people working there. (He said this all really quickly, so trying my best to summarize).

As for the EthylBenzene & Tolulene, Michael said those are not attributable to vapor intrusion in SD01 because they are not contaminants of concern. And that there was no evidence they exceeded OSHA PEL limits in the building. If I have any non-VI chemical questions, can arrange for a workplace evaluation by Austin.

Michael said would never turn HVAC off and if it someone said they did during wildfires, that must be a miscommunication.

Questions about land use restrictions are questions for the EPA.

Any additional questions I have about the specifics of soil/groundwater chemicals & vapor intrusion at the site, including my pending questions from April, will not be answered by EHS, since EHS has determined they feel confident there is no vapor intrusion in the building based on the historical tests and documents.

Jenna said I have a right to share concerns and talk to anyone about my concerns about the building. She said Apple would never restrict my right to speak about work place safety concerns. She said Apple would appreciate if I try to keep information accurate and also route people to EHS with questions, but not a requirement.

-Ashley

EHS Follow up

Scheduled: May 17, 2021 at 1:30 PM to 2:00 PM, PDT

Location: Virtual Conference One-Time Room

Invitees: Jenna Waibel, Ashley Gjovik, Michael Steiger

Re: EHS Follow up - Out of Office Notice

To: Ashley Gjovik

I'm out of the office on leave.

For due diligence or environmental matters, please contact Antone Jain at antone@apple.com.

For all other matters, please contact Scott Sidlow at ssidlow@apple.com.
