ALLERGY CLINIC - ALLERGY TEMPLATE

CLINIC VISIT: 11/6/2020

Patient: Ashley Gjovik

Self-Referred NON BLUE SHIELD ONLY N/A

Dear Dr.

I had the pleasure of seeing your patient, Ashley Gjovik, at our Allergy and Immunology Clinic for evaluation of her possible allergies.

Please see her intake form for her past med hx, past surgical hx, medications, and social hx and family hx.

Labs:

No results found for this or any previous visit (from the past 1008 hour(s)).

Impression: This is a 34 yo female who had moved into an apartment in Santa Clara (see record for location) in which she reports she was exposed to chemicals in the water and in the air which affected her health (abdominal issues, breathing issues, skin issues). She has since moved away and lives in a filtered unit in San Francisco. She reports she now feels better. There was no prior history of multiple chemical sensitivities.

Recommendations: I recommended she continue living in a place that has filters in the air and that she lives in areas where she can review the water and air quality first to ensure no issues. I am happy to have her RTC in 6-12 mo.

Thank you for this referral and involving us in care of Ashley Gjovik.

I spent 30 min face to face time and over 20 min in direct coordination of care and consultation for her multiple chemical sensitivities.
